Professional Summary

Computer Science (Data Science) undergraduate skilled in C++, Python, SQL, DSA, OOP, and full-stack development. Experienced in building AI/ML applications using React.js, Flask, TensorFlow, and computer vision. Strong foundation in software development, data analysis, and problem solving, with 150+ DSA problems solved on LeetCode.

Technical SKILLS

Languages: C++, C, Java, Python, SQL, JavaScript

Web Technologies: HTML5, CSS3, React.js, Tailwind CSS, REST APIs

Data & AI/ML: TensorFlow, Keras, TFLite/LiteRT, NLP, Computer Vision, Data Analysis

Core Concepts: DSA, OOP, DBMS, Operating Systems, Computer Networks

Technologies: IoT, V2I Communication, Real-Time Systems

EDUCATION

B.Tech in Computer Science & Data Science

Pranveer Singh Institute of Technology, Kanpur |

CGPA: 7.1

2023–2027

12th (ICSE)

Dr. Brij Kishori Dubey Memorial School, Kanpur |

CGPA: 7.0

2021–2022

EXPERIENCE/INTERNSHIP

Web Development Intern | **Cognifyz Technologies** |

Feb 2026 – April 2026

- Developed **5+ responsive web pages** using HTML/CSS/JavaScript
- Reduced page load time by **20%** through optimization
- Fixed **15+ UI bugs** improving user experience

PROJECTS

AI Resume Analyzer & Job Skill Gap Predictor

2026-2027

Python, Streamlit, NLP, Sentence Transformers

- Developed an AI-powered application to analyze resumes against job descriptions and generate **job-match scores**.
- Implemented **resume parsing, skill extraction, and semantic similarity analysis** to compare candidate skills with job requirements.
- Built a **skill-gap analysis module** to identify missing skills and generate personalized improvement recommendations.
- Developed an interactive **Streamlit interface** for resume upload, real-time analysis, and AI-generated feedback.
- LiveDemo : [AI Resume Analyzer · Streamlit](#)

NeuroScan.AI — Brain Tumor Detection Using MRI

React.js, Python, Flask, EfficientNetB0, TensorFlow, TFLite, REST API

- Developed a full-stack MRI classification application using **React.js and Flask REST API** for AI-assisted brain tumor detection.
- Implemented **EfficientNetB0 transfer learning** to classify MRI scans into **glioma, meningioma, pituitary tumor, and no-tumor** categories.
- Achieved **96.87% accuracy on 1,600 TFLite test images** and evaluated model performance using confusion matrix and class-wise metrics.
- Deployed the frontend and backend on **Render**, integrating the web interface with the production ML inference API.
- Live Demo : <https://neuroscan-ai-frontend.onrender.com/>

CERTIFICATIONS

- Oracle University – Data Science Professional Certification
- Infosys Springboard – Python, HTML/CSS

ACHIEVEMENTS & LEADERSHIP

- Solved 150+ Data Structures & Algorithms problems on LeetCode.
